PROFESSIONAL SUMMARY

Information Technology graduate (Magna Cum Laude) with hands-on experience in full-stack web and mobile application development. Proficient in React, Django, and PHP with strong knowledge of database design, REST API development, and QA testing.

TECHNICAL SKILLS

Languages: PHP, Python, JavaScript, SQL, Java, C#, C++

Frameworks: React, Django REST Framework, Blazor

Databases: PostgreSQL, MS SQL Server

Tools: Git, GitHub, JasperSoft Studio

Others: REST API Development, Google Maps API, Manual Testing

EXPERIENCE

Research and Development Intern – Direc Business Technologies, Inc.

Jan 2025 – Apr 2025

- Improved Asset Inventory Management System (AIMS) by converting it to Blazor framework using Radzen components
- Generated dynamic reports with JasperSoft Studio and collaborated with developers to implement enhancements

Freelance Tester – Testerwork Platform (Remote)

2024 – Present

- Performed manual testing for mobile and web applications, including Meta AI and various social media platforms
- Conducted functionality, usability, and data usage testing; executed test cases and documented results to enhance user experience

PROJECTS

KohiLocale: Coffee Shop Locator Platform (Capstone Project)

- Developed full-stack web and mobile application using React, Django REST Framework, and React Native
- Integrated Google Maps API for real-time location and mapping functionality

QuizIT: Web Application for Teachers and Students

- Developed quiz management system with Django REST Framework backend and React frontend
- Enabled teachers to create and manage assessments with seamless user experience

EDUCATION

Bachelor of Science in Information Technology – Bulacan State University, Malolos

2025

Graduated Magna Cum Laude

CERTIFICATIONS

Python Developer (Sololearn, 2025) | CC Certified in Cybersecurity (ISC2, 2025) | MOS Word 2016 (Microsoft, 2021)
